Dear [REDACTED]

RIS SUBMISSION—EXTENSION OF RCBO PROHIBITION

Thank you for providing a submission on behalf of ABB Australia.

Energy Safe Victoria (ESV) received five submissions in response to the RIS which included similar comments on several issues. As such, ESV has prepared a general response to these comments a copy of which is **attached**.

After considering the submissions received, ESV has not changed its position on the need for the RCBO prohibition to be extended for a further 10 years. As such, ESV has recommended that the Director of Energy Safety proceed with the extension of the prohibition.

Copies of the submissions received, ESV's responses to them and its statement of reasons are also available on ESV's website (Click on About>Legislation and regulations>Regulatory Impact Statement).

Yours sincerely
